CERTIFIED MAIL
RETURN RECEIPT REQUESTED

Mr. Kyle Holbrook
Facility Manager
Qualawash Holdings, LLC
45 Sonny Purdue Drive
Garden City, Georgia 31408

SUBJ: RCRA Compliance Evaluation Inspection
Qualawash Holdings, LLC
EPA ID No.: GAR 000 075 945

Dear Mr. Holbrook:

Enclosed is a copy of the U.S. Environmental Protection Agency inspection report documenting the results of the July 20, 2016, inspection of the Qualawash Holdings, LLC facility located in Garden City, Georgia. This was an EPA lead compliance evaluation inspection (CEI) for the purpose of evaluating the facility's compliance with the applicable Resource Conservation and Recovery Act (RCRA) regulations.

Enclosed is the CEI report that indicates violations of RCRA were discovered. A copy of this report has been forwarded to the Georgia Environmental Protection Division (GAEPD).

If you have any questions regarding this matter, please contact Daryl R. Himes, of my staff, by phone at (404) 562-8614 or by email at himes.daryl@epa.gov.

Sincerely,

A handwritten signature in cursive script that reads "Alan A. Annicella".

SUBJ: RCRA Compliance Evaluation Inspection
Qualawash Holdings, LLC
EPA ID No.: GAR 000 075 945

Dear Mr. Cown:

On July 20, 2016, a U.S. Environmental Protection Agency lead compliance evaluation inspection (CEI) was conducted at the Qualawash Holdings, LLC facility located in Garden City, Georgia, to determine the facility's compliance status with the Resource Conservation and Recovery Act (RCRA). Enclosed is the CEI report that indicates violations of RCRA were discovered.

If you have any questions regarding this matter, please contact Daryl R. Himes, of my staff, by phone at (404) 562-8614 or by email at himes.daryl@epa.gov.

Sincerely,

A handwritten signature in black ink that reads "Alan A. Annicella".

RCRA Inspection Report

1) Inspector and Author of Report

Daryl Himes
Environmental Engineer

2) Facility Information

Qualawash Holdings, LLC (Qualawash)
45 Sonny Purdue Drive
Garden City, Georgia 31408

EPA ID # - GAR 000 075 945

3) Responsible Official

Mr. Kyle Holbrook
Facility Manager

4) Inspection Participants

Daryl Himes, US EPA
Kyle Holbrook, Qualawash

5) Dates of Inspection

July 20, 2016

6) Applicable Regulations

Resource Conservation Recovery Act (RCRA), 42 U.S.C.A. §§ 6901 to 6992k
Sections 3002, 3005 and 3007 of RCRA, 42 U.S.C.A. §§ 6925 and 6927
40 Code of Federal Regulations (C.F.R.) Parts 260-270, 273, and 279

The Georgia Hazardous Waste Management Act, §§ 12-8-60 to 83 of the Official Code of Georgia Annotated

Chapter 391-3-11 of the Georgia Hazardous Waste Management Rules (GHWMR) (The Rules found in Chapter 391-3-11 were incorporated by reference 40 C.F.R. Parts 260-270, 273, and 279. Therefore, the citations in this report will be to the Rules found in 40 C.F.R. Parts 260-270, 273, and 279.)

7) Purpose of Inspection

The purpose of the inspection was to conduct an unannounced RCRA compliance evaluation inspection (CEI) to determine the facility's compliance with all applicable RCRA regulations.

8) Facility Descriptions

The Qualawash facility operates an over-the-road tank truck washing facility. Tank trucks sent to the facility for internal cleaning procedures were previously used to manage food and chemical products.

A recent Notification of Hazardous Waste Activity filed by the facility on February 24, 2016 indicated that the facility was a large quantity generator of hazardous waste.

9) Findings

Upon arriving at the facility, a brief discussion of the facility's tank truck cleaning operations was performed with Kyle Holbrook, the Facility Manager. During this discussion, it was determined that the facility performs its operations at this location using seven truck bays (See example of a bay in Photo 1) which are part of a building also housing business operations of several trucking companies.

The bays are set up to be capable of pulling a tank car into one side and out the other side of the building. At the time of the inspection, four of the bays were designated for tank cars previously managing food products and two of the bays are designated for tank cars previously managing chemical products. One bay was currently being used as a utility bay for materials used by the facility for cleaning.

During further discussions with Mr. Holbrook, it was determined that the facility does not clean tank cars that previously managed hazardous wastes. In addition, it was determined that the facility does not clean tank cars which contain products which the facility would be unable to use as a product for cleaning purposes if the product exceeds 0.3 percent of the tank cars volume and would be meet the definition of a hazardous waste.

Tank cars containing hazardous materials, which amount to less than 0.3 percent by volume of any tank cars they receive, cannot be used by Qualawash and are drummed and managed as hazardous waste generated by Qualawash and manifested off-site.

Below are the findings of the walk-through inspection.

No hazardous wastes were observed in any of the truck bays. In an area outside of the truck bays, three 55-gallon drums of hazardous waste were observed (Photo 2). Each of the drums were labeled with the words "Hazardous Waste (Photo 2)," marked with an accumulation start date on the tops of the drums and closed at the time of the inspection.

Also observed in this area were 13 one-gallon cans of paint, which were open at the time of the inspection. According to Mr. Holbrook, the paints were used to paint various items at the facility and the tops were left off to the point where the paint became unusable. The lids were placed on the containers during the inspection.

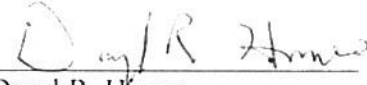

Pursuant to Ga. Comp. R. and Regs. 391-3-11-.08(1) [40 C.F.R. § 262.34(c)(1)(i & ii)] generators of hazardous waste accumulating up to 55 gallons of hazardous waste at an accumulation area shall keep the containers closed and label the containers with the words "Hazardous Waste" or with words which describe the contents of the containers.

10) Record Review

The facility's manifests, contingency plan, training records and inspection records were reviewed.

Upon reviewing the manifests, it was determined that the facility was operating currently as a small quantity generator of hazardous waste. The facility was currently performing weekly inspections of its container area, had a contingency plan and personnel training records.
